

Put AI agents to work at scale.

Give your team the evidence to say yes.

Spektris Assurance Center connects agent instructions, delegated actions, policy decisions, and business-system records. Investigate what happened, verify the result, and give agents more responsibility with confidence.

FROM THE ORIGINAL INSTRUCTION TO THE OBSERVED EFFECT.

MAKE EVERY ROLLOUT EASIER TO STAND BEHIND

Reconstruct the work

Follow instructions, delegated authority, and tool activity in one investigation.

Verify the business effect

Compare agent reports with independent records from the systems they changed.

Resolve the exception

Inspect mismatches and missing evidence with a record your team can review.

Measure the added value

Compare review and investigation effort. Include platform, operating, and rollout costs.

Bring one workflow. See the whole story.

Explore Assurance Center with the people who own your workflow. See the product, review integration requirements, and define a bounded evaluation with clear success measures and commercial terms.
